Glass Christmas tree ornaments have been our passion for many, many years. We are proud that the first ornaments were manufactured in our factory already in the mid-twentieth century! Since then, we have produced hundreds of thousands of decorations devoting maximum of our attention and diligence to each of them. We start with the work of our experienced blowers, who form the desired shapes from heated glass. Then we silver the ornaments and cover them with varnish background. So prepared, they are transferred to our talented artists who apply intricate decorations by hand. We adorn ornaments with varnishes, brocades, pearls and beads ... New designs and new ideas are born at all times – only imagination is the limit!

Our glass ornaments delight the eyes of customers in all countries where Christmas is celebrated. Carefully packed and secured, they travel from our factory in Piotrków Trybunalski to the whole world.

Welcome!
